(54) Title: ISOMALTULOSE OR TREHALOSE CONTAINING COMESTIBLES FOR SUSTAINED CARBOHYDRATE ENERGY RELEASE AND INCREASED FAT OXIDATION

(57) Abstract: The current invention relates to a dry composition comprising isomaltulose, at least a polyol and a carbohydrate selected from the group consisting of fructose, sucrose, invert sugar, and mixtures thereof. This composition is applied in solid, semi-solid and liquid comestibles. Furthermore, isomaltulose, trehalose or mixtures thereof are used in food to induce fat oxidation.

### INTERNATIONAL SEARCH REPORT

International application No. PCT/EP2004/007901

Box II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)
This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:
Claims Nos.:     because they relate to subject matter not required to be searched by this Authority, namely:
Claims Nos.:     because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
3. Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).
Box III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)
This International Searching Authority found multiple inventions in this international application, as follows:
see additional sheet
1. As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
2. As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
4. No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:
Remark on Protest  The additional search fees were accompanied by the applicant's protest.  No protest accompanied the payment of additional search fees.

### FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. claims: 1-19 (complete), 20-25 (partial)

Dry or liquid compositions based on the association between isomaltulose as the key ingredient and selected carbohydrates, and additionally comprising a polyol, to be used as an energy supply which does not prevent fat oxidation in the body. Uses of isomaltulose in the preparation of products having various physiological effects.

2. claims: 20-25 (partial)

Uses of trehalose for the manufacture of various categories of products having physiological effects.
